

Safety Services New Brunswick, in cooperation with the CSSE NB Chapter, is pleased to offer those delegates requiring more in depth, specific training an alternative to our traditional Symposium. By signing up for the Professional Development Module, you will take part in all the traditional networking opportunities of the Symposium (Meals, Social Events, Trade Show), you will also have an opportunity to attend the Friday sessions and keynote presentation. While other delegates will be attending the traditional symposium sessions, you will break off and attend an in-depth session geared towards your specific training needs. This year we are pleased to offer the following Professional Development Module.

**Canadian Society of Safety Engineering (CSSE)  
Project Management for the Health & Safety Professional**

This two-day, hands-on course provided by the CSSE is designed to provide health and safety practitioners with the tools and techniques to plan, manage, close and evaluate a project related to the health and safety environment. Based on best-practices in project management today, participants will also examine the leadership skills required to link health and safety project management to the operational areas of his or her entire organization.

Participants will work on a "live" project from the health and safety environment and apply PM tools and processes to simulate a complete project life cycle: from initiation to closure. Comparisons will be drawn between participants' current projects and past case studies. Teams will be structured so that each team has participants from various work environments. The course is hands-on, with practice simulations, using forms and templates commonly used in the project management field. The course will be based on the 4th edition of PMI's Project Management Body of Knowledge (PMBOK®) and Canadian Best Practices in the Safety Profession. Expected to be a CHSC course beginning in 2011, this course will require the successful completion of an exam for credit and may retroactively be applied to the Designation. Current CHSCs may apply the course to their personal CHSC Maintenance Program.

**Presented by Tammy Green**

Tammy Green is currently Corporate Project Manager and Health & Safety, Quality, Privacy Officer with Russell A Farrow Limited near London, Ontario. Reporting directly to the President and CEO, part of her responsibility involves managing corporate health and safety programs for company business operations in Canada (four provinces) and the USA (four states) and managing 700 employees in both office and warehouse environments regarding health and safety policy, procedures and training.

Tammy brings a wealth of training and experience in project management. A graduate of the University of Windsor, Tammy has also a Certificate in Human Resource Management, a Quality Process Engineer Diploma, a Masters Certificate in Project Management, and the CHSC designation from the Canadian Society of Safety Engineering. Tammy has a keen volunteer interest in Habitat for Humanity in south-western Ontario; she serves on two boards of directors, and has been involved in volunteer build sites on several locations in Canada, the US, and Mexico.
