 \$1600 **Non-Member**

Price does not include materials fee and instructor expenses

Per Person Rate \$125 **Member**
 \$150 **Non-Member**

Per Person rates apply to Public Courses

Course Format – 1 Day

The **Winter Defensive Driving Course** has been designed to help participants become a better and safer driver through a 1-day in-class session. In this course, participants will have the opportunity to learn what is involved in driving defensively in various weather conditions, why and how various types of motor vehicle collisions occur, and what it takes to prevent them.

Maximum number of participants per session – 20.

Course Objectives

The need for better, safe drivers is acute. Every day 11 people die in vehicle collisions and in one year, nearly 2950 people are killed in traffic collisions. This need is even more dramatic when you consider that 85% of traffic collisions are preventable by the driver.

Defensive driving represents an approach to the driving task, which can lessen your chances of being involved in a motor vehicle collision. The critical factor, which will determine the success of this approach, is the participant's own willingness and readiness at all times to apply the techniques and practices learned on this course.

Participants are encouraged to share what they learn in this course with family members, neighbors and co-workers. This will increase the effectiveness of the course in dealing with traffic collision problems everywhere.

Course Outline

- The importance of good driving habits during winter conditions
- The basic premise of defensive driving and what a defensive driver is
- How to define a preventable collision and understand the responsibilities attached to it
- Understand the influence light and weather conditions have on safe vehicle operation
- Ways to compensate for and avoid many potential crash situations
- Winterizing your vehicle
- State of mind
